| <ul style="list-style-type: none"><li>• Developing scalable and cost-efficient methods for training and deploying large AI system. Research themes: optimization algorithms, distributed training, model compression (pruning/quantization), Mixture-of-Experts, agentic AI &amp; routing, and continual learning.</li></ul> |                              |

**Research Scholar**  
Syracuse University  
Advisor: [Prof. Venkata Gandikota](#)

September 2023 – June 2024

- Studied the expressiveness of piecewise linear functions attained by deep neural networks through the lens of linear regions. Work involves analyzing the number of regions attained by the learned network and its ability to adapt to different domains based on its expressivity and linear regions.
- Studied extensions for a distributed Quasi-Newton method for general optimization algorithms

**Research Assistant (Master's Thesis)**

August 2022 – May 2023

Syracuse University  
Advisor: [Prof. Ferdinando Fioretto](#)

- Conducted a survey of End-to-End constrained optimization learning and researched an amortized method for the Decision-Focused Learning paradigm. Our framework involves developing a surrogate machine learning model for a continuous relaxation of the discrete optimization problem and substituting the learned model with the optimization solver within the pipeline.
- ["End-to-End Decision-Focused Learning Using Learned Solvers"](#)  (2023). Theses - ALL. 714. <https://surface.syr.edu/thesis/714>

## PROJECTS

---

**Adapting Transformers for Domain-Specific Reasoning and Higher-Order Logic**

May 2022

- Collaborated with a small team to implement attention-based mechanisms for learning higher-order logic theorem proving. We implemented multiple language models and trained them on the HolStep dataset in an attempt to study automatic theorem proving; [Project Link](#) 

**Optimal Stopping Problem with Unknown Variable**

December 2021

- Analyzed one form of the optimal stopping problem known as the secretary problem which has a closed form solution. The equation requires the number of candidates to be known beforehand. Collaborated with a team member to attempt to find an efficient solution to the same problem but without access the number of candidates; [Project Link](#) 

**University Petition System**

December 2020

- Collaborated with three team members to develop a course petition website for the American University of Beirut. This platform enables students to submit their petitions along with their transcripts, which are automatically parsed. The chairperson is notified if the students meet the petition requirements.
- This project enabled us to significantly streamline the process, saving the chairperson countless hours previously spent organizing and reviewing transcripts to determine if the requirements have been met;
- Technology stack: JavaScript | Node.js | React | MongoDB  
[Project Link](#) 

**Power Monitor**

July 2020

- Cofounded & developed power monitor, pitched to Lebanon's public government energy sector. Enable the sector to transition into digital bills and cut down on the required transportation. Saving the government thousands of dollars each month
- Allows users to track daily/monthly usage, electricity bill, and carbon footprint using the phone application; [Product Website](#) 

## TECHNICAL SKILLS

---

**Languages:** Python, C/C++, JavaScript, Julia, Dart

**ML/DS:** PyTorch, Numpy, Keras, HuggingFace, LangChain, SciPy, CvxPy, Scikit-Learn

**Other:** Flask, React, Flutter, SQL, GraphQL, REST API, Selenium, CUDA, HTCCondor, Azure, AWS

## FELLOWSHIP & AWARDS

---

**NeurIPS Financial Assistance Award 2025**

Financial award from the NeurIPS Conference to support registration and accommodation for attendance at the Thirty-Ninth Annual Conference (~ 2500\$).

**Engineering Graduate Student Travel Grant 2025**

Travel award from Rice Engineering Alumni to support engineering graduate students who are attending conferences or professional meetings to present their research work (500\$).

### Computer Science Graduate Student Support Grant 2024

Financial award from the Rice University Computer Science Department granted to first year graduate students to support conference participation, Rice-related travel, and research related expenses (2500\$).

## TEACHING EXPERIENCE

---

### Graduate Design and Analysis of Algorithms

Teaching Assistant

COMP 582 | Rice University

Spring 2025

Houston, TX

- Graduate course: Advanced Design and Analysis of algorithms.  
Taught by [Prof. Xiaoyun Fu](#)

### Introduction to Object-Oriented Design

Teaching Assistant

CSE 283 | Syracuse University

Spring 2023

Syracuse, NY

- Undergraduate course: Fundamental software design concepts of functional decomposition and object-oriented design.  
Taught by [Prof. Farzana Rahman](#)

### Computer Organization & Programming Systems

Teaching Assistant

CIS 341 | Syracuse University

Spring 2023

Syracuse, NY

- Undergraduate course: Essentials of computer organization, digital logic, microprogramming, processors, memories, input-output devices. Instruction sets, assembly language, data types, relation to high level languages.  
Taught by [Prof. Farzana Rahman](#)

### Assured Programming and Formal Methods

Teaching Assistant

CIS 623 | Syracuse University

Fall 2022

Syracuse, NY

- Graduate-level core course: Reasoning about programs through the specification, design, and realization of provably correct programs. Taught by [Prof. Andrew Lee](#)

### Advanced Computer Architecture

Teaching Assistant

CIS 655/CSE 661 | Syracuse University

Spring 2022

Syracuse, NY

- Graduate-level core course: Memory systems, pipelining, simultaneous multithreading, run-time optimization, array processing, parallel processing, multiprocessing. Taught by [Prof. Ehat Ercanli](#)

## OUTREACH & EXTRACURRICULAR

---

### President and Co-Founder

Syracuse University Graduate Chess Club

February 2022 – October 2022

Syracuse, NY

- Co-founded the Graduate Chess Club at Syracuse University and served as the Acting President, orchestrating the club's growth with over 150 participants during my tenure. Successfully merged the meetings of the graduate and undergraduate chess clubs, fostering a cohesive and inclusive chess community within Syracuse University.
